MTD INVERTERISATION

SACMI for energy savings

Transform your **fixed-speed** batch mill into a **variable-speed** batch mill with **inverter**.

Optimized consumption management

ADVANTAGES

- Energy savings of up to 10%
- Up to 15% reduction in cycle times
- “Soft” starts and lower maintenance costs

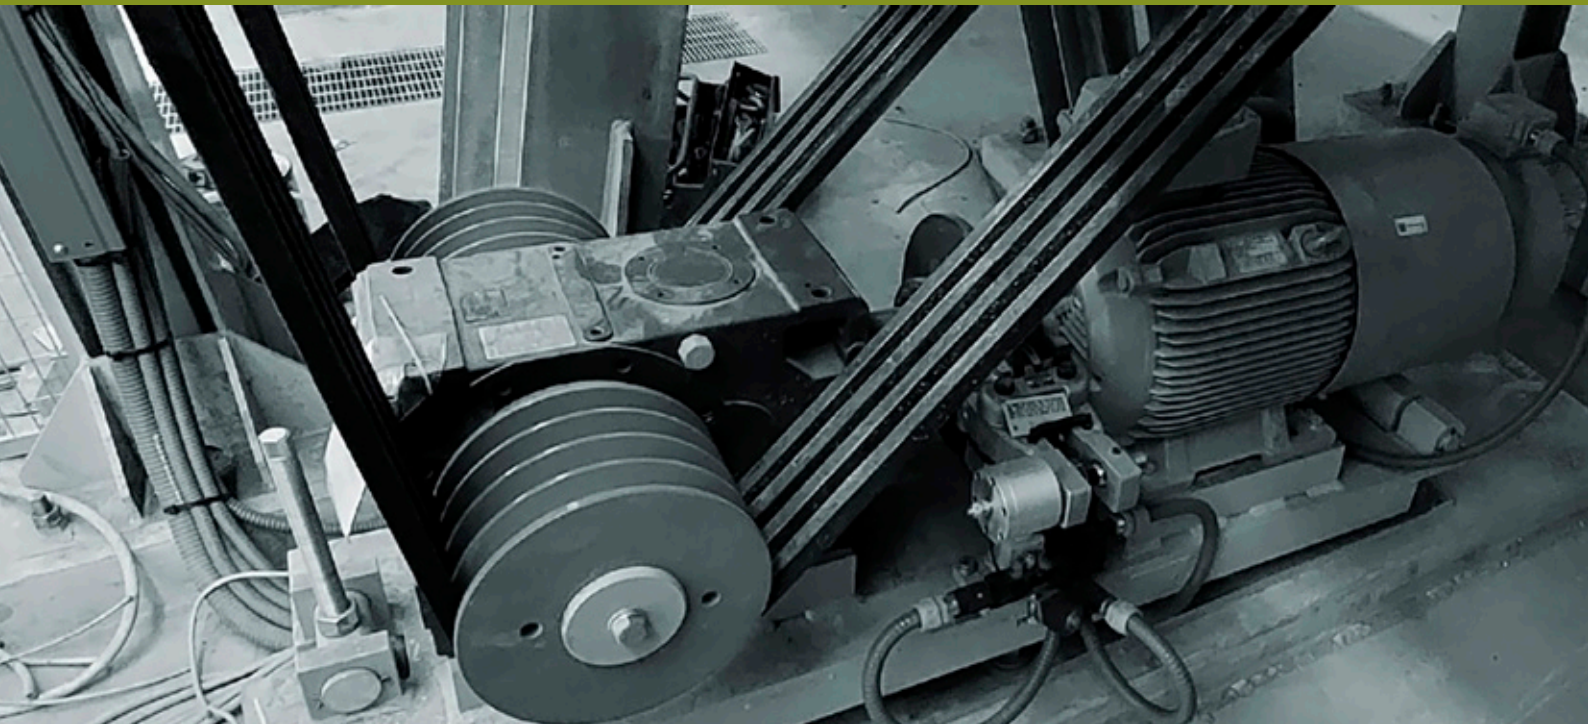

See other revamping solutions for body preparation

MTD INVERTERISATION

Technical features

By adding an **inverter** to the control panel and setting the machine to run at constant power, the mill increases speed as the grinding cycle progresses, thus reaching the residue more efficiently than at fixed speed.

This allows for: significant **energy savings**, a considerable **reduction in grinding time**, for the same final product.
