## NEW MTD HATCHES

SACMI for efficiency

Increase the efficiency of your batch mill with the installation of new **hatches**.

The intervention **simplifies** the loading/unloading phase of the mill, allowing all operations to be carried out with a **single positioning**.

Reduced Downtime

## ADVANTAGES

- Simplification
- Ergonomics
- Shorter loading-unloading times

## NEW MTD HATCHES

### Technical features

The new hatches allow a **single positioning of the mill** at the end of the grinding cycle, with the vent at the top and the discharge at the bottom:

- **Venting hatch:** large\*, to quickly load raw materials for the next cycle.
- **Discharge hatch:** equipped with a rubber grill and manual valve, it allows only material to exit; the grill is accessible from both sides for easy cleaning.

Additional precautions minimise wear on the hatch plug.
